Full UV protection in clear ZEISS lenses. All day. Every day.
ZEISS Lenses with UVProtect Technology

Start caring for your eyes today

ZEISS Lenses with UVProtect Technology.
The new standard for all clear spectacle lenses.

- UV radiation is always there. All year round, all day, even when it is cloudy.
- It is as dangerous for your eyes as it is for your skin. UV radiation is one of the biggest challenges to long-term eye health.
- UV protection is recommended against harmful UV rays up to 400 nm. But up to 80% of today's clear lenses do not offer full UV protection.

Check with your optician if your lenses do.

HANNA FISCHER

Height 170 | Bust 78 | Waist 60 | Hips 85 | Hair brown | Eyes brown | Dress 34 | Shoes 38
